***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 6-9, 15-18 and 24-27 rejected under 35 U.S.C. 102(e) as being anticipated by Murakami.
3. Murakami teaches (abstract and figure 1, 2 and 8) a communication device and method comprising a receiver which receives audio data, data amount information indicating data amount of the audio data that has been controlled and media data other than audio (MIDI data); a data amount restorer which restores the controlled data amount of the audio data to the original data amount with reference to the data amount information; and a reproduction indicator which indicates reproduction of the audio data whose data amount is restored the restorer

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2665

5. Claims 1-2, 4, 5-11, 13-21 and 22-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Murakami.

6. Regarding claims 1-2, 5, 10-11, 14, 19-21, 23 and 28, Murakami teaches (abstract and figure 1, 2 and 8) a communication device and method comprising: a data amount controller which controls the amount of the digital audio data to be transmitted in accordance with the transfer rate; and a transmitter which transmits the audio data whose data amount is controlled by data amount controller and the media data other than the audio data and data amount information indicating data amount of the audio data controlled by data amount controller.

7. Murakami does not teach a transfer rate estimator.

8. Sawaya teaches (abstract) a transfer rate estimator, which estimates transfer rate of data before transmission. It would have been obvious to one of ordinary skill in this art to adapt to Murakami's system Sawaya's transfer rate estimator to provide a suitable rate for transmission of signals

9. Regarding claims 4, 13 and 22, as mentioned above, Murakami and Sawaya teach all of The limitations in claims 1 and 10 and 19.

10. As for the data amount controller thinning out the audio data to control the data amount, this limitation is in no way novel and it would have been obvious to one of ordinary skill in this art to adapt to Murakami and Sawaya's system this or any other obvious control method as a matter of design choice.

Art Unit: 2665

***Conclusion***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Suglyama (U.S. 5790745) is cited to show the state of the art.
